username password set it whatever you wish > add site
wait till it loads then turn on one click admin

click wp admin button near top right
1.

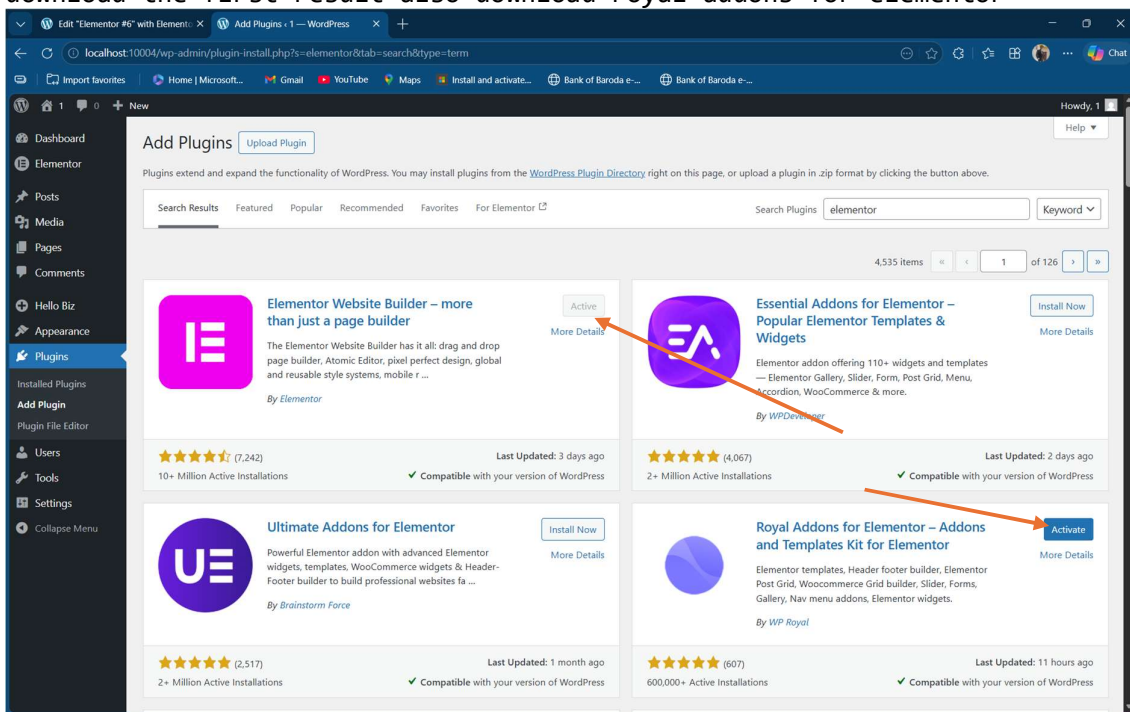

on left pane click plugins > add plugin
search for elementor

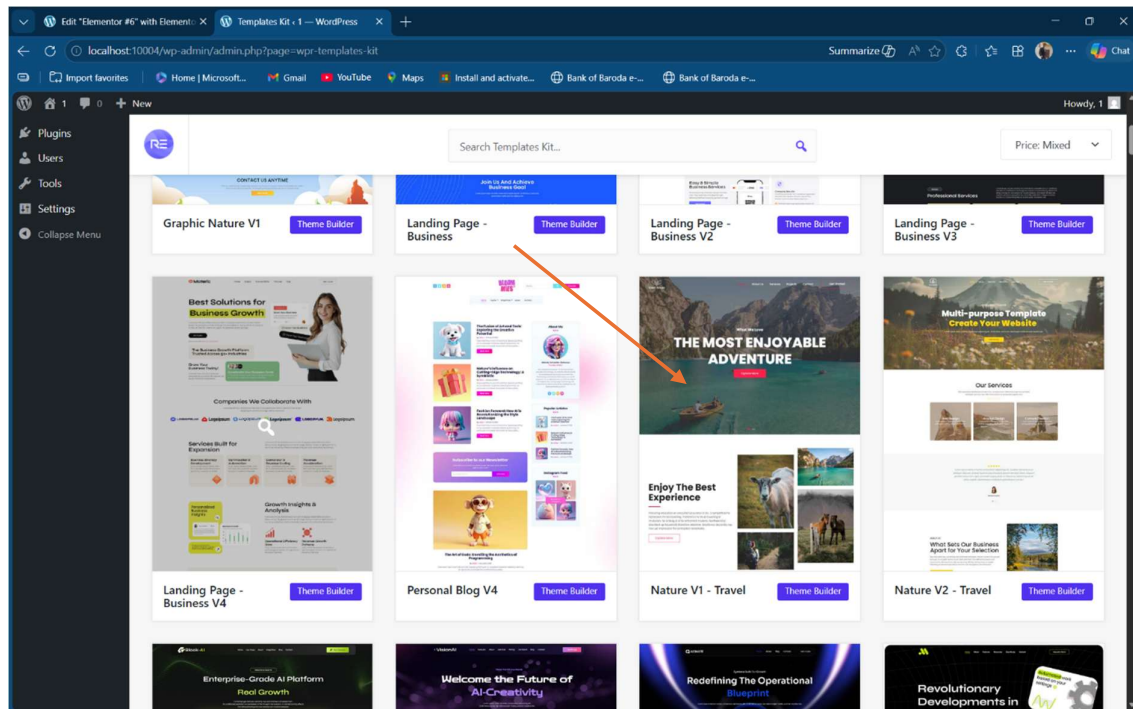

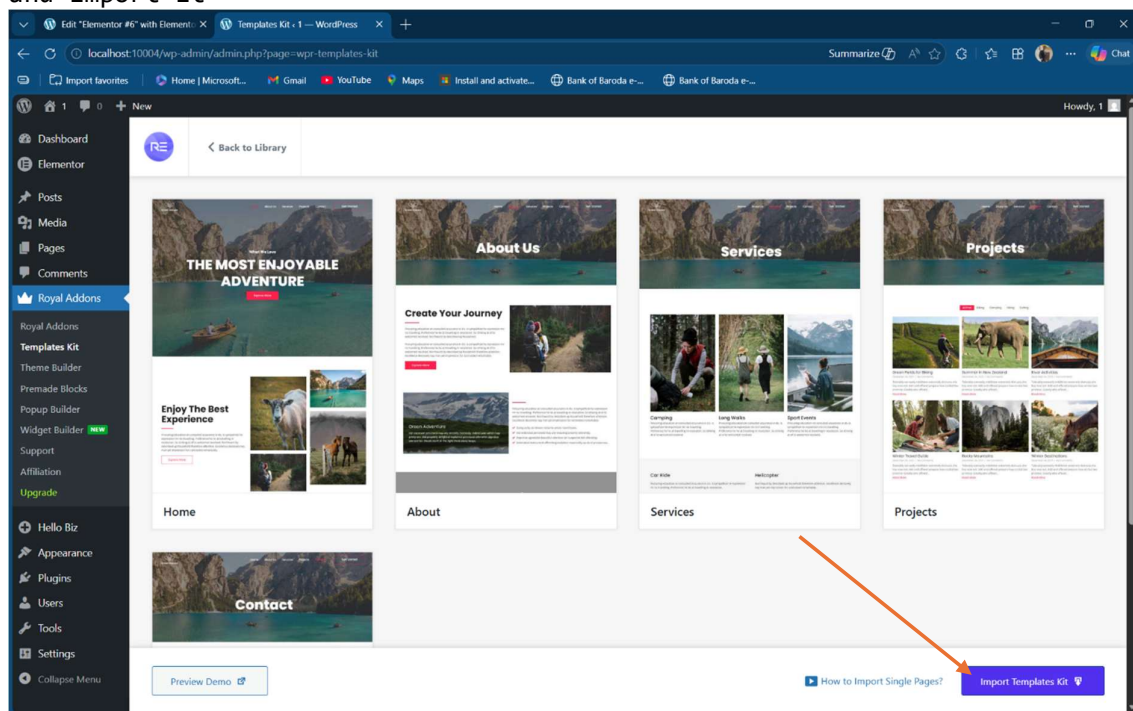

download the first result also download royal addons for elementor

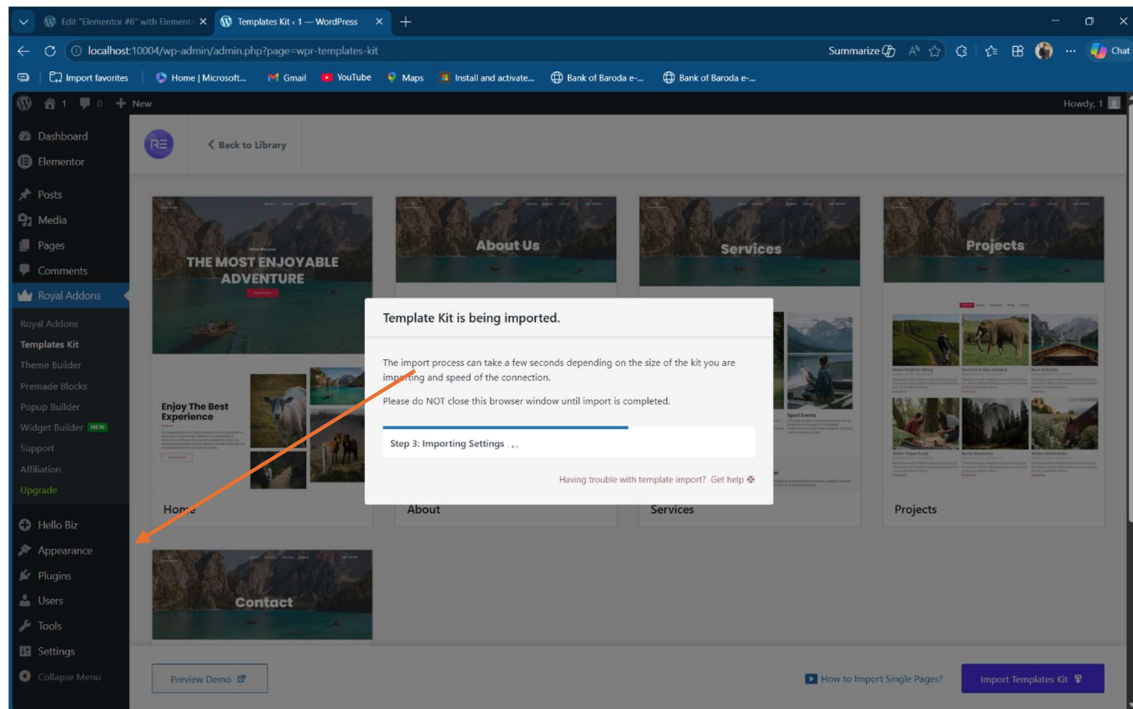

activate the plugins after download (it takes time be patient) after activating the plugin launches itself so return to plugins > add plugins > search for elementor and activate the second plugin royal addons for elementor

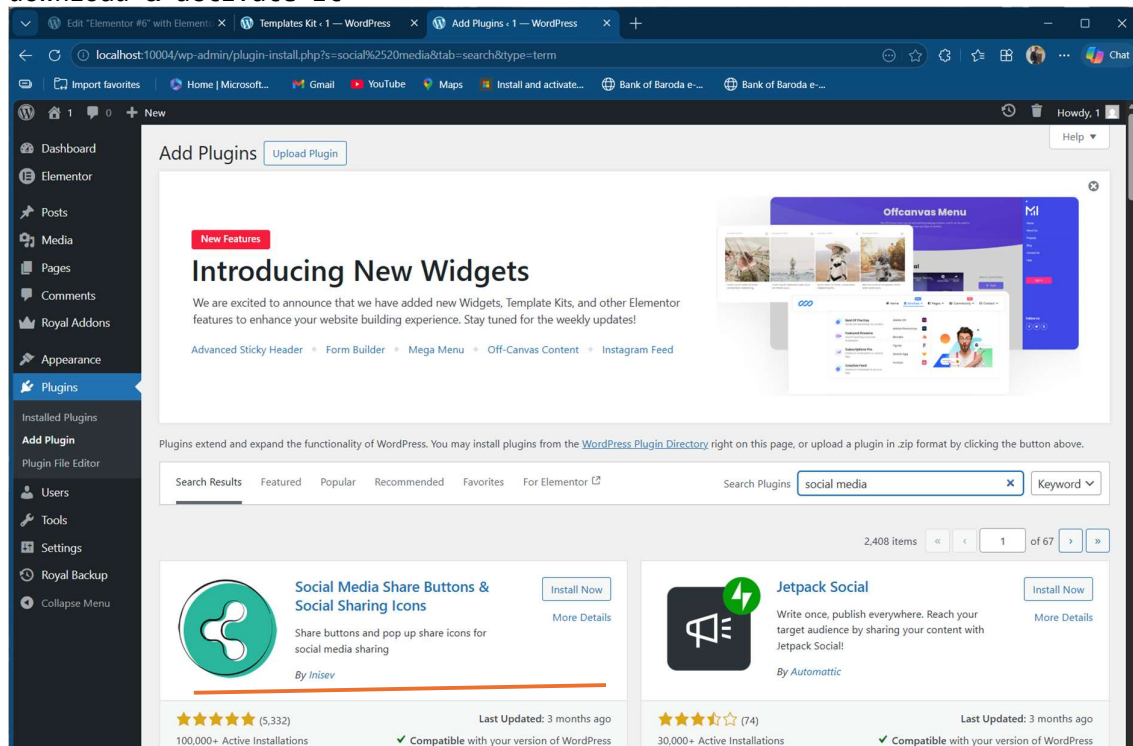

when the royal addons for elementor launches choose a unique free template and import it

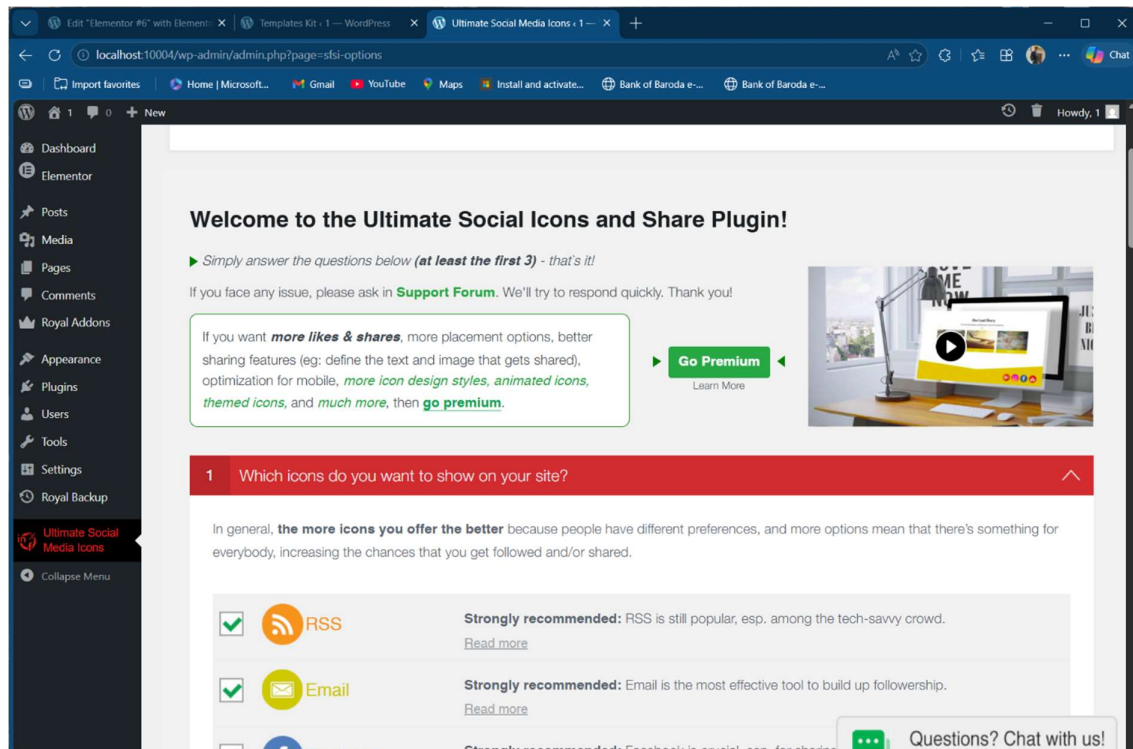

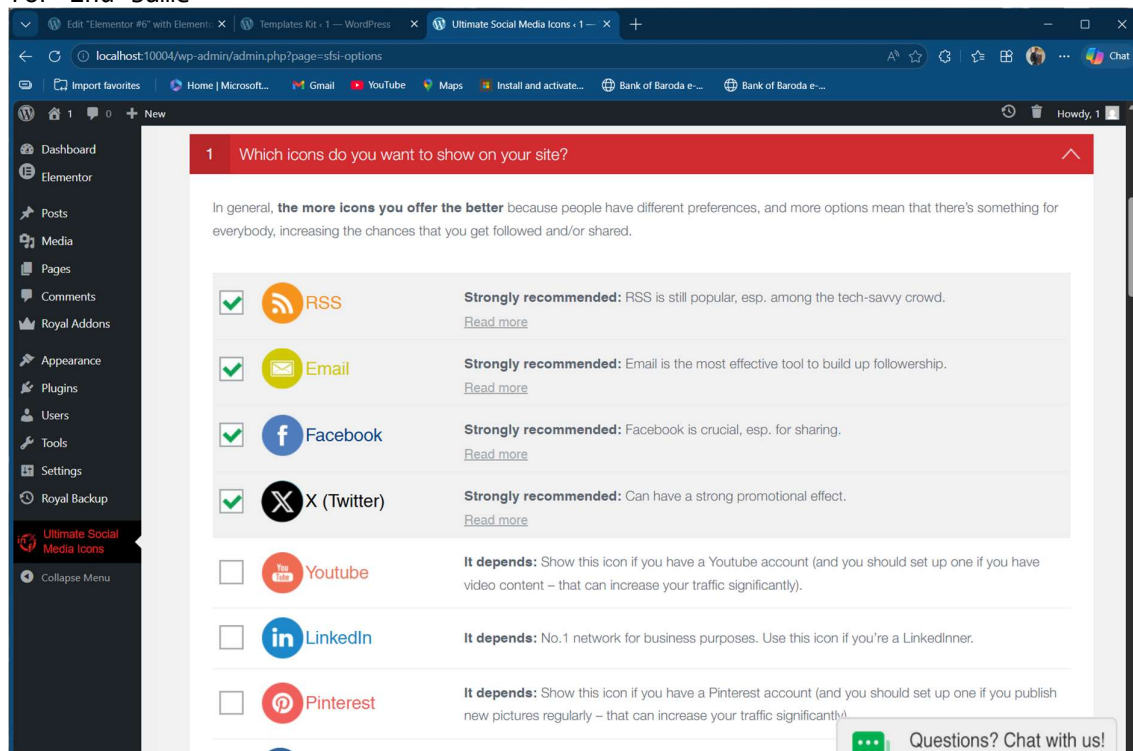

(wait patiently for it to complete)
return to plugins > add plugins > search social media search buttons and
download & activate it

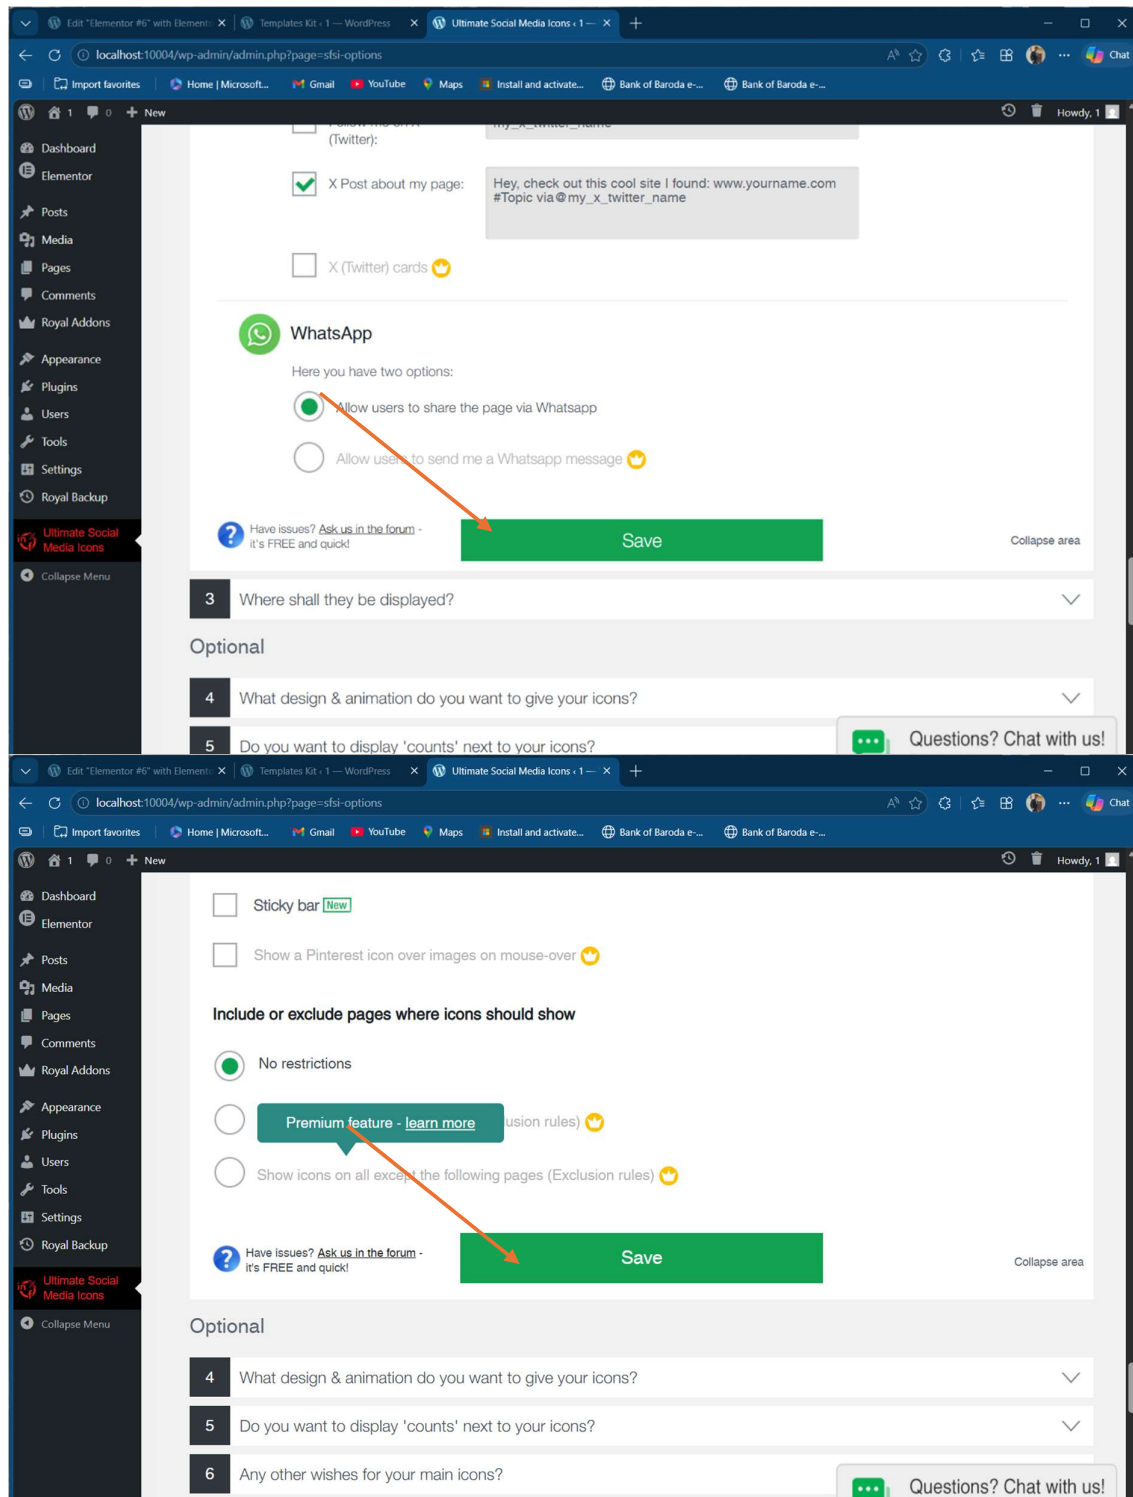

after activation it launches automatically and it asks 3 simple questions

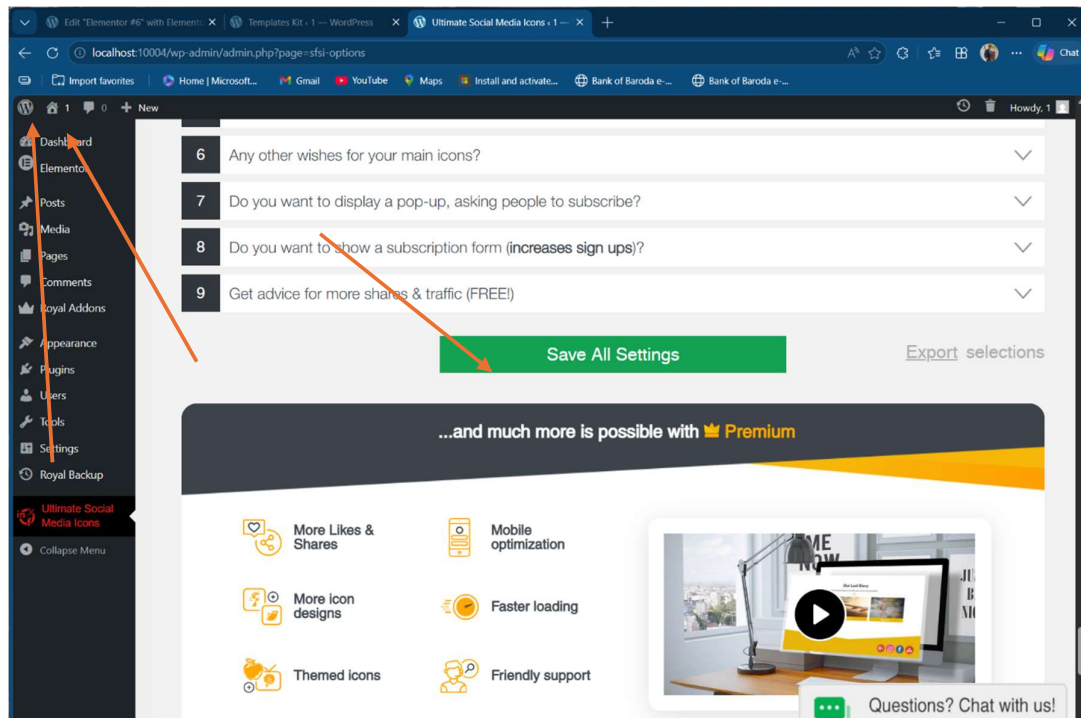

for 1st just open the dropdown scroll down and save
for 2nd same

for 3 (image missing) select *Floating over your website's pages* for position your choice scroll and save

after these 3 questions there are more optional questions skip them and
click on save all settings
click on the top left side home logo
done

clicking on the W logo in top left brings you back to admin panel explore
it to answer any question thrown at you
